

**IN THE SPECIFICATION:**

Please replace the paragraph at page 4, lines 28-34, of the specification with the following paragraph:

--In the present experiment, to experiment the embodiment concretely, acetone is used as the solvent used for weighing and mixing strontium carbonate ( $\text{SrCO}_3$ ), silica ( $\text{SiO}_2$ ), and europium oxide ( $\text{Eu}_2\text{O}_3$ ), and then ball milling or agate mortar is used as a mixer of the solvent and ~~the~~ the components of strontium carbonate ( $\text{SrCO}_3$ ), silica ( $\text{SiO}_2$ ), and europium oxide ( $\text{Eu}_2\text{O}_3$ ).--
